## INTRODUCTION.

With the declaration of the Second World War in September 1939, there was a sudden jump in the prices. Prompt measures were adopted throughout India to control the situation. Consequently, H.E.H. the Nizam's Government also appointed a Committee for checking the profiteering in the Dominions.

A separate temporary establishment was sanctioned for carrying out the work of the Committee. Most of the statistical data and graphs as required by the Committee were prepared and supplied by the Department of Statistics. It may be pointed out that except in case of rice, the prices of other foodgrains showed no cause of anxiety till the end of 1350 F. (1940-41). This is why the demand for dearness allowances was not so very active in the Dominions, and the Wages. Census returns showed a slight rise on their Pre-War scale.

Thus when the Second World War has upset the market conditions and the Government, the producers and the suppliers of primary goods keep an anxious watch over the price movements, a record of "RETAIL AND WHOLE SALE PRICES" of principal commodities for a successive period of ten years is a welcome addition to the books of reference. With this issue there become available the prices of certain principal staple foodgrains for an unbroken period of fifty years.

In the present issue certain useful additions have been made, *viz.*, the average retail prices of six articles and the quinquennial average retail prices of seven other commodities.

The numerous charts and diagrams appended enhance the statistical value of the publication.

Mr. Thomas, the Deputy Director of Statistics and Mr. Wajid Ali, of my office, were of material help to me in the timely compilation of this volume.

MAZHAR HUSAIN, M.A., B.SC.,

*Director of Statistics and Census.*
